Majestic Fresh Brew Coffee Machine

MENU OPTIONS

INGREDIENT TIMES

Ingredient Times provides access to a set of submenus, which allow modification of the parameters controlling the recipe and dispensing of individual drinks. The actual content of the sub-menu is dependent on the configuration of the machine. That is for example an Instant Hot version will have different drinks in its **Ingredient Times** sub menu to a **Double Fresh Brew** version fitted with a carbonator. In general the entries of the Ingredient Times menu will consist only of the drinks available on that particular configuration of machine. The Hot Beverage Merchandiser range has a number of pre-defined configurations. For each configuration each selection button is associated with a particular drink. This association is fixed for each configuration. For example if the top left button in a given configuration provides an instant coffee drink then the Coffee entry in the Ingredient sub menu will allow adjustment of a limited number of parameters relating to a coffee selection, it is not possible to reprogram the button to behave as a completely different drink e.g. an **Espresschoc**.

For each selection a user with Manager level access is granted a limited range adjustment on a subset of the parameters. This allows the site-based personnel to perform minor taste profile modifications without the need to call an engineer. The limited range adjustment is implemented as a multiplying scale factor of between 75% and 125%. In **manager's mode** the limited range of adjustment permitted is displayed as a signed value between -25% and +25% and can be changed in 5% increments. For example the limited range strength control for the coffee ingredient of an Espresschoc selection, which has had its coffee ingredient increased by 5% would appear to a manager level user as:

OP: Coffee Mod +5%

When viewed with engineers level access this would appear as:

OP: Coffee Mod 105

In each case the same parameter is being viewed.

The following tables describe the parameters that can be adjusted for each drink, and indicate the parameters visible at the different access levels. The drinks available in each configuration are described in Table 14.b later in this Section.
